## EDUCATION

### California State University, Fullerton

Fullerton, CA

Bachelor of Science in Computer Science | | Dean's List 2020 – 2021

Aug 2018 – May 2022

Relevant Coursework: OO Programming; Data Structures; Software Dev w/ Open Sources; Software Engineering

## PROFESSIONAL EXPERIENCE

### AMAZON

Irvine, CA

Fulfillment Center Associate

02/2023 – Present

- Leveraged technology to efficiently process and fulfill customer orders with exceptional accuracy and speed.
- Utilized advanced inventory management systems to proficiently store a diverse range of products, ensuring their meticulous organization and optimal readiness for future deliveries.
- Fostered collaborative relationships through effective communication with team members and supervisors, utilizing digital tools to enhance workflow and achieve operational excellence.
- Actively contributed to process improvement initiatives by providing feedback and implementing best practices.

## EXTRACURRICULAR ACTIVITIES AND LEADERSHIP

### CSUF Association of Computing Machinery (ACM)

Fullerton, CA

ACM-Dev Member

03/2021 – 05/2021

- Engaged in a semester-long initiative wherein participants were organized into cohesive groups to foster collaboration in the pursuit of a collective project.
- Collaborated Project: <https://github.com/justdiam12/TuffyClock>

### TuffyHacks Hackathon

Fullerton, CA

Hackathon Participant

03/2021

- Collaborated with two colleagues to develop an application for my school's hackathon event
- Facilitated ideation sessions and provided ongoing support in troubleshooting technical challenges during the coding process.

## SKILLS

- **Programming Languages:** Bash, C++, JS, MATLAB, Python, R, SQL, Swift, X86 Assembly
- **Tools & Other Skills:** Agile, Apple Maps, Atom, CSS, Git, GitHub, HTML, Linux, MapKit, MySQL, Netlify, React, Scrum, SCSS, Trello, Ubuntu, Visual Studio

## PROJECTS

### Mobile Multi Map | Swift

<https://github.com/CSUF-CPSC411-2022S/project-mobile-multi-map-mmm>

- A user-friendly application that enables individuals to input multiple geographic locations, subsequently leveraging advanced API to generate an optimized route on an interactive map interface.

### Tic-Tac-Toe | Python

<https://github.com/dkim286/cpsc362-proj>

- An interactive tic-tac-toe application leveraging a graphic user interface (GUI) to facilitate seamless user engagement
- Offers engagement in local Player vs. Player (PvP) or Player vs. Computer (PvC) gameplay.

### CS BS | JS

<https://elastic-liskov-447e80.netlify.app/>

- An information-centric website empowering users to contribute and share their own curated resources pertaining to specific computer science topics, fostering a collaborative platform for knowledge spreading within the CSUF computer science community.

### Weather React App | JS

<https://zesty-malabi-109fc4.netlify.app/>

- A sophisticated website application that grants users the capability to effortlessly retrieve real-time weather data for precise geographic locations, providing them with up-to-the-minute meteorological insights.
